# North River Collaborative Fiscal Year 2021Annual Report

North River Collaborative Stephen Donovan, Ed.D. Executive Director 198 Spring Street, Rockland, MA 02370 781-878-6056 <u>www.northrivercollaborative.org</u> December 2021 Intentionally left bank.

December 06, 2021

Dear Members of the Board of Directors, School Committees, and Colleagues,

As the Executive Director of the North River Collaborative (NRC), I am delighted to present to you the Fiscal Year 2021 Annual Report. The report summarizes the highlights of the past school year in which the collaborative focused its efforts on our core mission of providing high-quality, cost-effective educational programs and services for students, districts, partner organizations, and communities.

In this report, you will find:

- Information on the programs and services provided by the collaborative;
- Discussion of the cost-effectiveness of these programs and services;
- Discussion of the progress made toward achieving the objectives and purpose set forth in the collaborative agreement; and
- Audited financial statements and the independent auditor's report.

North River continues to be a fiscally healthy organization as you will see in the audited financial statement. NRC maintains a fund balance just short of the maximum allowable by statute which is sufficient to support the collaborative's needs. Our Capital Reserve Fund continues to support maintenance and improvements to the North River School and Conference Center facility. During the summer of 2021, NRC hired an architect to explore the possibility of enhancing the North River School by adding elementary and middle school therapeutic classrooms.

Throughout the past year, NRC has continued to demonstrate resiliency and a steadfast commitment to education, community, and the health and safety of our students in the midst of the ongoing challenges faced due to the COVID-19 pandemic.

On behalf of the entire NRC staff, I would like to thank member district administrators and staff for their input and involvement with the collaborative. The continued success of the collaborative depends on this participation as educational collaboratives exist to "bring school districts together to form partnerships that maximize efficiency by sharing costs and expertise" in order to enhance the lives and effectiveness of students, families, and educators. It is this work that we do on behalf of districts that keeps the North River Collaborative moving forward as an organization.

Lastly, on behalf of the collaborative, I would like to thank John Marcus, Superintendent of the Stoughton Public School Schools, for his dedicated service as a Board member to the North River Collaborative and wish him well in his future endeavors.

Sincerely,

Stephen Donovan, Ed.D. Executive Director

Intentionally left bank.

#### **Section 1: Governance and General Information**

The North River Collaborative (NRC) is governed by the superintendents of the member districts: Abington, Avon, Bridgewater-Raynham, East Bridgewater, Hanover, Holbrook, Rockland, Stoughton, West Bridgewater, and Whitman-Hanson. Each member district annually appoints its superintendent of schools to form the NRC Board who is vested with the authority given it by Chapter 40, Section 4E of the General Laws, and all acts amendatory or supplementary thereof, to take necessary action to oversee the operation of the collaborative. In addition, there are regular advisory meetings of the special education directors/director of student services and the assistant superintendents/curriculum coordinators throughout the year to provide input and feedback about the programs and services as well as information about emerging needs in the districts. The tables below list the members of each of these groups for the 2021 fiscal year. The North River Collaborative is grateful for their service.

## **Board of Directors**

- Peter Schafer, Abington •
- Christine Godino, Avon
- Derek Swenson, Bridgewater-Raynham •
- Elizabeth Legault, East Bridgewater •
- Matthew Ferron, Hanover •

## **Special Needs Advisory Committee**

- James Robbins, Abington •
- Karen Romans, Avon •
- Paul Tzovolos, Bridgewater-Raynham •
- John Phelan, East Bridgewater •
- Keith Guyette, Hanover •

## North River Collaborative Administrative Team

- Stephen Donovan, Executive Director •

## 2019-2023 Strategic Plan

#### Mission

The North River Collaborative cooperatively develops and delivers high-quality and cost-effective programs and services for students, school districts, partner organizations, and communities.

#### Vision

The North River Collaborative (NRC) provides innovative, flexible, and diverse educational programs that engage and motivate students to reach their potential.

## **Guiding Beliefs**

We believe that...

- Programs, services, and facilities should be of the highest quality and responsive to the changing needs of students.
- All students should be provided with the opportunity and support to reach their potential for academic achievement and independent living.
- All students should be challenged to learn in a caring, inclusive, and flexible environment that appreciates diversity, values life-long learning, and prepares students to be successful.
- Achieving equity is a continuous process of assessment, reflection, and continuous improvement.
- High-quality professional development combined with educator evaluations is essential for improving education practice and maximizing student achievement.
- Supporting the social and emotional well-being and self-determination of our students is essential.
- Through collegiality and shared commitment, we accomplish more collectively than separately.
- To facilitate the educational process, we need to support families.
- A variety of opinions will stimulate innovative and creative ideas leading to effective solutions.
- Student assessment and program evaluation are essential to continuous improvement.

#### **Strategic Objectives**

- **Objective 1:** Evaluate and enhance existing programs and services.
- **Objective 2:** Establish responsive, strategically designed programs and services.
- **Objective 3:** Expand and enhance a coordinated and state-of-the-art student transportation system.
- **Objective 4:** Secure and adapt facilities and operations to support high-quality programs and services.

## **Section 2: Programs and Services**

The North River Collaborative offers the following programs and services (described on subsequent pages) in accordance with its Collaborative Agreement:

- Day School Placements (North River School) and other services for students with disabilities (Learning Center Programs)
- Alternative School Programs for At-risk Students (Independence Academy)
- Community-Based Vocational Services
- Behavior Consultation and Education Services
- Therapy Services
- Vision Services

- Social Work Internship Program
- Family Services
- Professional Development
- Transportation Services
- Collaborative Grant Applications
- General Education Supports and Services
- Psychoeducational Evaluations
- Municipal Medicaid Reimbursement

The programs/services listed above are not all-inclusive. The NRC Board of Directors, acting at the request of the NRC Executive Director and/or member districts may consider and approve other programs/services to be provided by the collaborative so long as such programs/services are in the best interest of the members and are not inconsistent with M.G.L. c. 40, sect. 4E and 603 CMR sect. 50, et seq, as amended from time to time.

## **North River School**

North River School provides middle and high school students with a highly structured and therapeutic environment while ensuring the 21st century skills they will require post-graduation are taught and developed. NRS addresses the academic, social-emotional, and behavioral needs of students individually in alignment with the most current and best practices. In addition to traditional academic subjects, students also participate in daily living and transitional skills classes such as a culinary internship, the Innovation Studio, and social-emotional learning.

The NRS curriculum is aligned with the Massachusetts Curriculum Frameworks and is modified as needed to meet individual student needs, providing added supports throughout the day to facilitate success. Instruction is delivered in a small group format within a therapeutic milieu with counseling services and behavioral consultation. A strong home-school relationship is a critical and essential part of the program's success, and one that is fostered through regular, two-way communication.

The goal of the North River High School is to assist students in developing the behavioral, socialemotional, and academic skills needed to successfully return to their sending schools. Students receive academic credits toward graduation from their own school districts by completing the course of studies provided at the North River School. Vocational exploratory opportunities, including off-site internships, are offered. The Innovation Studio is a technology-based class that incorporates the most current tools and technology such as 3D printing, graphic design, desktop publishing, and model building. In addition, students in this class are introduced to small business operations through the design and printing jobs that community agencies and groups hire NRS students to complete under the direction of the class instructor. The Culinary Exploration/Food Service continuum of classes teaches students culinary and food service skills as well as addresses food safety, nutrition, work habits, and entrepreneurial skills.

Internships in the community are also offered to upperclassmen in good academic standing with support from a job coach as needed. Students, with prior agreement from their district's TEAM, also have the opportunity to participate in their district's academic and extra-curricular activities. It is the goal of NRS to incorporate flexibility and creativity when addressing the needs of students.

The North River Middle School (NRMS) is a Massachusetts DESE approved public special education day program. The NRMS's mission is to assist students in developing appropriate behaviors and improved academic skills which will allow them to achieve success in transitioning to high school and/or returning to their sending school.

North River Middle School serves students in grades 5 through 8 in classrooms designed for small-group instruction, with an integrated therapeutic milieu, counseling services, and a behavior management system with guidance from a Board-Certified Behavior Analyst. A strong home-school relationship is encouraged as an essential part of the school's success. North River Middle School has a dedicated School Adjustment Counselor as well as a therapy dog, Bodie.

The NRMS teachers work with students to earn academic credit toward promotion to high school. Core curriculum academics focus on preparing students for success on MCAS tests and overall educational achievement. The NRMS schedule includes life skills development, health and wellness education, social-emotional learning, and vocational exploration.

Both the NRHS and the NRMS have a well-developed, successful summer program that helps students prevent regression of social, emotional, and academic skills during the summer break.

## **Learning Center Programs**

The Learning Center for Students with Multiple Disabilities serves students ages 3 to 22. This program is designed to meet the academic, medical, and therapeutic needs of students with disabilities in multiple areas. Communication, self-care, mobility, and vocational and leisure skill development are addressed throughout the day and guided by the teacher, classroom staff, and an extensive therapy and vision support team. Program nurses oversee promotion of overall student health. This program offers a summer program as well as community field trips. Classroom locations within public schools allow students access to inclusive opportunities in order to help facilitate academic and social skill development.

The Learning Center for Students with Autism Spectrum Disorder serves students ages 3 to 22. This program is within a structured ABA-based program where students are provided with the behavioral, social-emotional, and academic support to meet their unique needs. Communication, self-care, mobility, and vocational and leisure skill development are addressed throughout the day and guided by the teacher, classroom staff, and an extensive therapy and behavior support team. This program offers a summer program as well as community field trips. Classroom locations within public schools allow students access to inclusive opportunities in order to help facilitate academic and social skill development.

## **Independence Academy: Recovery High School**

**Independence Academy** (IA) is committed to providing cutting-edge programming that is responsive to the emerging needs of adolescents in the areas of substance use, social-emotional, and mental health needs. We believe that students who are using substances or engaged in some other maladaptive behavior(s) at a problematic level deserve an opportunity to develop the mindset, awareness, knowledge, and skills needed to be happy and healthy. We believe in focusing on the growth and development of students with a vision for moving forward towards a more positive future. We believe that by taking the primary emphasis from substances and instead examining each student's own unique experiences and circumstances, that this will ultimately lead to a different mindset around substance use and other maladaptive behaviors and provide an opportunity to create a happier and healthier life. As one of only five recovery high schools in Massachusetts, IA enrolls students from the southeast region of Massachusetts that have been identified as "high-risk" due to their use of substances. However, our work focuses on addressing a specific set of domains of each student's life. We have created a multi-tiered intervention model that is focused on the personal growth and development of each student with an emphasis on their overall health and wellness. At IA we define recovery as being engaged in a process of change to improve our health and wellness, live a self-directed life, and strive to reach our full potential.

Independence Academy offers a recovery high school which provides students engaged in recovery with a full, rigorous academic program leading to high school graduation as well as numerous service components that support a students' transition out of high school. Some of those components include an on-site recovery counselor (LICSW), a personal development coach, health and wellness curriculum and activities, and a comprehensive summer program. Existing partnerships with community service agencies allow for program

enhancements and provide unique opportunities for students enrolled at IA. The academic counselor at Independence Academy works closely with each student's sending school district staff to ensure that each student meets the local graduation requirements for their respective district. As a result, students are awarded a diploma from their sending school district upon completion of all requirements.

In accordance with the Massachusetts Curriculum Frameworks, Independence Academy provides an education that is individualized to best meet student needs while taking into consideration their strengths, abilities, and interests. IA aims to provide students an education which enables them to communicate effectively and empowers them to think critically and become well-informed, active members of society. IA's small class sizes provide an environment that encourages students to be highly motivated, accept the challenge of an academically rigorous curriculum, work independently, and meet the pace of a technology-rich world. Students are encouraged to seek educational opportunities outside of the traditional school day (i.e., independent study, internships, etc.). The daily academic schedule focuses on interdisciplinary units that are co-taught by a team of teachers. Utilizing current research, teachers provide a learning environment that capitalizes on student strengths and allows students to focus on areas that need development. The staff actively work on goal setting with students and assist them with academic opportunities that allow them to explore areas of interest and prepare them for post-secondary education and training.

Independence Academy staff strive to provide students with positive adult role models and social supports in and out of school. Our school provides recovery programming and education that is interwoven into their daily routine. Students participate in both group and individual recovery work during the school day. Our counseling staff works closely with each student and their family/support network to educate, support, and cultivate resources within the community with the ultimate goal of helping students to live a self-directed life and realize their true potential.

In addition to providing students with a comprehensive educational experience, Independence Academy is also determined to become the primary resource for school districts and communities in the region to address issues related to healthy adolescent growth and development. Through strong community partnerships, short-term intervention programs for out of school youth, and outreach work, IA is committed to working with the surrounding communities to better address the growing concerns of substance use and its impact on adolescents and families.

Completing its ninth full academic year in 2021, Independence Academy has enrolled hundreds of students from over 40 different communities.

## **Community-Based Vocational Program**

The **Community-Based Vocational Program** (**CBV**) supports students between the ages of 16 and 21 with unique learning styles who need vocational and transitional skills training. For many, this is their first introduction to the world of work. Students are matched to community-based worksites with supervision from a job coach. The job coach's role is to teach transferable skills which can be applied in a variety of post-secondary settings. As students become proficient at community-based sites, responsibilities are increased to match their progress.

Student progress is measured quarterly through Task Analysis Sheets, evaluating specific vocational tasks according to a five-point rating scale. Twice a year, this five-point rating scale is applied to Massachusetts Work Based Learning Plans to assess students on work readiness skills at established vocational sites.

Student enrollment varies from one to five days per week, depending on individualized circumstances. Programming includes a transition skills group, focusing on self-advocacy, self-determination, and post-secondary options. Several times per year, presentations from the Department of Developmental Services, Massachusetts Rehabilitation Commission Service Coordinators, a Benefit Specialist, and a representative from a local housing authority are scheduled. Exercise at a state-of-the art fitness center and internships are scheduled each day. All students are transported in 7D vehicles.

The Program Coordinator works closely with parents and students to facilitate the transition process. This may include tours of adult service providers, local colleges, volunteer opportunities, job placement, travel training, housing, and recreational opportunities. In-depth vocational assessments are provided for each student. Upon request, the Community Based Vocational Program will develop individualized programs outside of the "typical" schedule to accommodate unique situations.

#### **Community-Based Vocational Services**

Frolio School, 1071 Washington Street, Abington MA 02351 Phone: 781/871-1589 Moira Leon – Coordinator

#### Summer Work and Learning Program

The North River Collaborative's Summer Work and Learning Program provides an innovative summer program offering a broad range of transition services for students with intellectual impairments, developmental disabilities, behavioral challenges, and autism. The program is differentiated for students ages 14-17 and 18-22 who may attend one or more summers. The program is located at Rogers Middle School and select community-based job sites. A broad range of transition services are tied to academic support and remediation for students through hands-on instruction and opportunities for daily work experiences such as horticulture, building maintenance, shipping and receiving, office practices, and food service.

Students participate each day in a variety of activities offering instruction in life skills for independent living including: daily living skills (e.g., managing money, use of household tools/appliances, time management, health and safety, basic meal preparation, health and fitness leisure/recreation activities, community experiences), social thinking skills, job exploration (e.g., training opportunities and job placement, developing/maintaining appropriate work skills and behavior), and functional academics.

#### Summer Work and Learning

The Almshouse, 198 Spring Street, Rockland, MA 02370 Phone: 781/878-6056 (Ext. 107) Clarice Doliber – Assistant Executive Director and Philip Buckley – SWL Coordinator

## **Behavior Consultation and Education Services**

The North River Collaborative's Behavior Consultation and Education Services (BCES) includes extensive training and ongoing support in developmental disabilities, autism spectrum disorders (ASD), applied behavior analysis treatment and intervention approaches, and community and school-based support services. BCES staff members have experience in service delivery to students with ASD, other disabilities, and typical students experiencing difficulties with behaviors that interfere with learning and social relationships. In addition to responsibilities of assessments and program design, Board Certified Behavior Analysts (BCBAs) provide supervision and training to behavior service providers working in students' homes and to our classroom staff on a regular basis.

With input from other professionals, BCBAs focus on facilitating the development of each student's skills in

the area of communication, academics, social-emotional, receptive, and expressive language, leisure/play, adaptive behavior, and activities of daily living. A strong emphasis is placed on the use of research-based applied behavior analysis (ABA) principles and strategies including discrete trial instruction (DTI) and incidental teaching within the natural environment. Strategies and techniques incorporated may include visual supports, social stories, and behavior support plans. When needed, home-based services provide parents and other caregivers training in techniques to teach, promote, and manage skills and behaviors at home and in the community.

One BCBA is certified to teach the Safety-Care<sup>™</sup> Behavioral Safety program for North River staff, providing the skills and competencies necessary to effectively prevent, minimize, and manage behavioral challenges with dignity, safety, and the possibility of change.

#### **Behavior Consultation and Education Services**

The Almshouse, 198 Spring Street, Rockland, MA 02370 Phone: 781/878-6056 (Ext. 120) Keith Guyette – Coordinator

#### **Therapy Services**

The North River Collaborative provides **occupational**, **physical**, **and speech therapy services** within 38 school buildings in nine school districts. Services are also provided within North River Collaborative Learning Center for Students with Multiple Disabilities, Learning Center for Students with Autism and Developmental Disabilities programs and the North River School. The collaborative's therapy staff is dedicated to excellence in student service, committed to facilitating and supporting optimal curriculum access and participation, and provides high-quality consultation services to parents and educational staff in order to maximize student success. At each location, therapists are integral members of a multidisciplinary team that facilitates student progress through a coordination of services. More than 17 licensed physical, occupational, and speech therapists, most with advanced degrees and certifications participate in monthly meetings and ongoing professional development activities to enhance knowledge and maintain an evidence-based practice. Therapists provide each student with service guided by the current developments in therapeutic, rehabilitative, and educational best practices.

#### **Therapy Services**

The Almshouse, 198 Spring Street, Rockland, MA 02370 Phone: 781/878-6056 (Ext. 120) Keith Guyette – Coordinator

## Services for Students with Visual Impairments

#### **Teachers of the Visually Impaired**

The North River Collaborative employs a teacher of the visually impaired to provide program-based consultative and direct services to students with visual impairments. The collaborative also works with member/non-member district towns to provide itinerant vision services and assessments to students with visual impairments who are attending district schools.

Teachers of the visually impaired provide functional vision assessments, learning media assessments, technology assessments and instruction, consultation to staff and parent/guardians, Braille instruction, compensatory skill development (e.g., large print, optical devices, etc.), life skills (e.g., daily living skills, social interaction skills, recreation, and leisure addressed through the expanded core curriculum), and production and ordering of materials. Additionally, teachers of the visually impaired may support schools and families in accessing educational resources through a variety of agencies such as the Massachusetts Commission for the Blind and American Printing House.

#### **Orientation and Mobility**

The North River Collaborative provides consultative and direct services to students with visual impairments from certified orientation and mobility instructors. The collaborative works with member/non-member school districts to provide itinerant orientation and mobility services to students with visual impairments who are attending district schools.

Services provided by the orientation and mobility instructor may include functional travel assessments, consultation to staff and parents/guardians, travel instruction in school and community settings, compensatory skill development (e.g., low vision aids, use of other senses, and spatial relationships), and life skills training (e.g., daily living skills, social interaction skills, recreation, and leisure) through the expanded core curriculum.

#### Vision Services

The Almshouse, 198 Spring Street, Rockland, MA 02370 Phone: 781/878-6056 (Ext. 120) Keith Guyette – Coordinator

## **Social Work Internship Program**

The North River Collaborative's Social Work Internship Program provides school-based social work services to help students and their families face a complexity of challenges in order to foster competency in all areas central to children's lives – academic, social-emotional, and behavioral. The consultation process establishes and implements interventions to meet students' needs. Services include individual and group counseling, crisis interventions, whole-class presentations, lessons, and consultations with parents and teachers. These services enhance teacher effectiveness related to social-emotional development of children and facilitate a functional "bridge" relationship between home and school. The interns attend Bridgewater State University, Simmons University, and Boston College.

#### Social Work Internship Program

The Almshouse, 198 Spring Street, Rockland, MA 02370 Phone: 781/878-6056 (Ext. 302) Beth Litchfield – Coordinator

## **Behavioral Health Initiative**

The North River Collaborative Behavioral Health Initiative (BHI) offers on-site behavioral health consultation to districts, professional development on social and emotional learning strategies, and facilitates development of student support teams. Contracted school social workers and wrap-around service support for students and their families are also available to districts. The Coordinator of the BHI program is available for staff training in the area of mental health on an as requested basis.

#### **Behavioral Health Initiative**

The Almshouse, 198 Spring Street, Rockland, MA 02370 Phone: 781/878-6056 (Ext. 301) Deni Howley – Coordinator

## **Psychological and Behavioral Services**

#### **Psychoeducational Evaluations**

The North River Collaborative employs a school psychologist to provide psychoeducational evaluations to both member and non-member districts.

#### **Board Certified Behavioral Analyst**

The North River Collaborative employs a Board-Certified Behavioral Analyst (BCBA) who provides and supports the implementation of behavioral and safety plans within the North River Collaborative Learning Center for Students with Multiple Disabilities, Learning Center for Students with Autism and

Developmental Disabilities, and the North River School. The BCBA also provides Functional Behavioral Assessments (FBA) to member and non-member districts.

#### **Psychological and Behavioral Services**

The Almshouse, 198 Spring Street, Rockland, MA 02370 Phone: 781/878-6056 (Ext. 120) Keith Guyette – Coordinator

## **Municipal Medicaid Reimbursement**

School-based Medicaid billing has become a way for cities and towns to recoup dollars for funds spent on special education programs if a student is receiving special education services and is eligible for Mass Health. Direct services claiming provides school districts an opportunity to be reimbursed for furnishing medically necessary services to eligible Mass Health students pursuant to an eligible IEP. The North River Collaborative is familiar with both school and town governance and aware of confidentiality and privacy issues, including HIPAA and FERPA, as well as the necessary recordkeeping required by districts, towns, and the Office of Medicaid. An annual cost report reconciles 12 months of direct service and administrative cost.

#### **Municipal Medicaid Reimbursement**

The Almshouse, 198 Spring Street, Rockland, MA 02370 Phone: 781/878-6056 (Ext. 105) Marc Wright – Director of Business and Finance

## **Professional Development**

NRC is committed to providing high-quality professional development programs based on current research and best practices that focus on improving the learning of all students. The collaborative's decisions about the selection/identification of programs and courses, audience, scheduling, duration, and implementation factors are driven by research-based standards for professional learning, such as those identified by the Massachusetts Department of Secondary and Elementary Education.

Professional development offerings for the North River Collaborative and district staff are determined based on ongoing and newly identified needs of our member districts, the needs of low-incidence educational staff, state, and federal mandates, emerging issues, and current educational best practice. Curriculum coordinators from each member district and the collaborative's program coordinators work to collaboratively plan programs that address collective needs. Programs are designed to focus on knowledge and skill development to impact student learning. When educators from many school districts participate in professional development training together, they have the opportunity to share with and learn from one another, often discovering a synergy that results in understanding, growth, and solutions that were unanticipated.

Professional development training and support are provided to the North River Collaborative and district educators in order to:

- Continue to improve educational practice and maximize student achievement;
- Support supervision and evaluation to improve instruction;
- Improve curriculum and content knowledge and address pedagogy with a specific emphasis on differentiation, practices regarding assessment, and instructional technology integration;
- Address the issues of mental health, behavioral issues, and student safety;
- Address the individual needs of students including students with disabilities and ELLs; and

• Provide programs locally that are convenient for district staff to attend.

#### North River Collaborative

198 Spring Street, Rockland, MA 02370 Almshouse Office PD Phone: 781/878-6056 (Ext. 102) Kim Beck – Coordinator

## **Southeast Transportation Network**

The Southeast Transportation Network served 360 students in 40 school districts in FY21, most of which are from the North River Collaborative, Pilgrim Area Collaborative, and South Shore Educational Collaborative regions. Given the fiscal challenges and the growing concern for student safety, the North River Collaborative is coordinating this program to obtain cost-effective, quality transportation for students with special needs who attend public and private special education programs in the greater Boston/Southeastern Massachusetts region. Through the Network, the North River Collaborative began providing transportation with the opening of school in September 2007. In-service training is provided for all staff on topics such as: disability awareness, first aid/CPR, behavior management, defensive driving, securing wheelchairs, vehicle evacuation, and winter driving.

# Section 3: Progress Toward Achieving NRC's Purpose and Objectives

#### Purpose

The purpose of the collaborative is to provide intensive educational programs and services for students with disabilities, professional development to educators, related services to students with disabilities in member and non-member districts, and other high-quality, cost-effective services to meet the changing needs of member districts. The North River Collaborative has been successful in achieving this purpose as outlined below.

## **Objectives**

The overall objectives of the North River Collaborative Agreement are to:

- 1. Provide programs for students with low-incidence disabilities in the least restrictive environment;
- 2. Offer a variety of quality professional development opportunities to general and special education teachers and administrators, and related service providers;
- 3. Provide programs and services in a cost-effective manner;
- 4. Explore and pursue grant and other funding to support identified needs of the districts; and
- 5. Offer cooperative programs and/or services to help districts maximize cost efficiency and program effectiveness through a collaborative effort.

Objective 1: Provide programs for students with low-incidence disabilities in the least restrictive environment • Objective 5: Offer cooperative programs and/or services to help districts maximize cost efficiency and program effectiveness through a collaborative effort

The North River Collaborative provides programs and services for students with low-incidence disabilities in the least restrictive environment including social-emotional, multiple disabilities, autism, English learners, behavioral health, and substance abuse.

- The Learning Center programs are provided in age-appropriate public-school buildings with inclusion opportunities provided, whenever feasible.
- The North River School is an alternative setting for middle and high school students who have difficulty functioning successfully in public schools due to behavioral, social, emotional, and/or psychological challenges. The staff work closely with school districts to align curriculum with that of sending districts to allow students to transition back to local schools when appropriate.
- Independence Academy is an alternative setting for students with diagnosed substance abuse disorders. The staff work closely with school districts to align curriculum with that of sending districts to allow students to transition back to local schools when appropriate.
- For transition-age students, the North River Collaborative provides supports for students within community-based job sites through the Community-Based Vocational program and Summer Work and Learning program.

- The North River Collaborative provides services in member and non-member school districts that allow students to remain in their local community schools while receiving essential services to enhance access to the curriculum. In this way, instead of students leaving their districts, the services are brought to them and the educators that support their learning. These services include occupational, physical, and speech therapy; behavior consultation; vision services including orientation and mobility, teacher of the visually impaired, Braille-trained aides; and social work services.
- The North River Collaborative also provides cooperative services to school districts including Municipal Medicaid reimbursement and special education transportation.

Each of these programs strives for continuous improvement in meeting student or district needs. This section includes a discussion of the progress of the North River Collaborative through program enhancements made throughout the school year.

## **NRC Programs**

## North River School

- Nine (9) students earned their high school diploma from six different school districts.
- Twenty-three (23) students attended the 2020 ESY Program. The first two weeks of the summer program were remote and the latter two weeks were an optional hybrid model. Thirteen (13) students took part in our hybrid model with great success.

- Due to the success that we had with remote learning and student participation, NRS continues to provide a Chromebook to every student to complete assignments online, if they choose.
- NRS staff had a myriad of professional development opportunities at the beginning of September as well as throughout the school year. Topics ranged from "Equity and Trauma" to "Google Classroom 101."
- With the support from the Safe and Supportive Grant, the team conducted a book study on "Culturally Responsive Teaching and the Brain" by Zaretta Hammond. Team members presented the material during a Professional Development Day and had tremendous feedback from staff.
- North River School was nominated for the DYS Commissioner's Award for "Strong Community Partner."

- We introduced the newest member of the NRS clinical team, Bodie, a hypoallergenic Bernadoodle. Bodie has been a therapy dog for three years and is loving all the attention he is getting from the students and staff.
- NRS disseminated its first newsletter in the winter and received great feedback from families and districts. The newsletter will be sent on a quarterly basis with report cards and is available on the website.
- NRS distributed a few parent surveys throughout the year and virtually all respondents report that they "always" felt supported by their student's team at North River.
- With the support of the BCBA, NRS has worked diligently to enhance the accessibility of "real time" data. The improved data collection has enhanced IEP meetings as well as helped students see their progress on a daily basis.
- NRS completed DESE's Coordinated Program Review with zero findings.
- Lauren Enos and Heather Crowley completed "Train the Trainer" Safety Care (Restrained Prevention) training.
- NRS staff was able to recognize students for "perfect attendance" every term during the 2020-2021 school year.

## **Learning Centers**

#### **Program Enhancements**

• Learning Center teachers and therapy staff collaborated to develop and implement monthly thematic units based on the Unique Learning System (ULS) curriculum. The ULS is an online curriculum correlated to the Massachusetts Curriculum Standards. The ULS provides thematic lessons across all domains that are age appropriate and leveled to meet the needs of students with special needs who are accessing the curriculum standards at a variety of different access points.

Additionally, the Learning Centers accessed 274 grant funds to purchase a variety of materials designed to enhance instruction across programs. These included:

- Bluetooth switches to connect student switches with iPads
- > Materials to create sensory area in the Autism Elementary program
- Switch accessible toys and Power Links for environmental controls for students in the Multiple Disability programs
- Additional pre-vocational task boxes for the early childhood and elementary classrooms designed to provide foundational skills

• The Learning Center programs also purchased standers and adaptive seating to update gross motor developmental positioning equipment for the Multiple Disabilities classrooms.

- In the fall of 2020, professional development for Learning Center staff focused on strategies to enhance learning for students participating remotely. Avra Robinson presented in-depth trainings on Google Classroom. Debra Hand of the Department of Secondary and Elementary Education presented suggestions and practical strategies on collecting portfolio evidence for remote learners participating in the MCAS-Alt.
- In the spring of 2021, professional development focused on strengthening family partnerships. Learning Center staff participated in a training aligned with the DESE Strengthening Partnerships Framework, provided by Pinnacle Partnerships, to apply the principles of Collaborative Problem-Solving Approach within this framework.

## **Independence Academy**

- Independence Academy (IA) graduated a total of 9 students this year and held individual ceremonies for each at the school.
- In a shift to a hybrid schedule, all staff received professional development on Google Classroom, Advanced Google Classroom, and Google Meet.
- All staff received professional development from the Equity Imperative in line with IA's work on the Safe and Supportive Schools grant.

- A modified summer program was run remotely credit recovery, counseling support and a class called "Race, Equality and Inclusion."
- All staff received CPR/First Aid certification.
- The NRC/IA Reopening Plan was developed and implemented for a return to school, and IA ran a full in-person schedule for all students five days per week. Wednesdays and Fridays were optional in-person days.
- Brockton Public Schools Food Services Department (Chartwells) established a free lunch/breakfast program for all students enrolled. All students are receiving free meals daily.
- IA continued to participate in the Plymouth County Drug Endangered Children's Subcommittee meeting.
- Staff at each of the state's five Recovery High Schools got together for a state-wide professional development opportunity supported by the Institute for Health and Recovery to facilitate additional collaboration between programs.
- IA's "donate a bag" fundraiser concluded in January. This year, IA raised money for "Support the Soupman" as their collaborating partner and was able to raise \$1000 for Independence Academy.
- The wifi system was updated/upgraded and new wireless access points were put in to expand coverage and improve speed.
- Additional security cameras were installed throughout the building.
- IA continued to run a modified Upper Course, short-term intervention, for youth suspended out of school for substance related offenses.
- A strategic plan was developed in response to the state's evaluation report and submitted to DESE and was sent to the NRC Board of Directors.
- IA continued to participate in the monthly meeting with the Plymouth Youth Development Advisory Committee.
- All staff received monthly support/self-care guidance through the Institute for Health and Recovery along with the other RHS staff.

- IA students and staff conducted a virtual presentation for students and staff at Rising Tide Charter School.
- IA participated with DESE, the Collaborative for Educational Services, and other RHS leaders to discuss organizational rounds that are being conducted at the RHS during the 21-22 school year as part of DESE's evaluation of RHS programs.
- Two alumni who are now enrolled in college, came to speak to students on Tuesday afternoons in May and June. One student also used the time to do an art project with the students.
- Students participated in the Math, ELA, and Science MCAS exams in June.
- A model shift was presented to the NRC Leadership team as well as DESE for the upcoming 21-22 school year. The idea of promoting a shorter-term model in addition to the Recovery High School model was suggested.

## **Community-Based Vocational**

- All activities were posted on Google classroom for all Community-Based Vocational (CBV) students to access remotely or in class.
- CBV continued participation in community-based vocational sites five days per week.
- CBV collaborated with the Disability Law Center to create social stories.
- The social stories CBV students created were aired on the Talking Information Center website.
- The Boston Bowl in Dorchester was added as a new job site.

- CBV students obtained ServSafe Food Handler Certifications.
- Two CBV students took part in competitive employment opportunities.
- Two person-centered planning meetings were held with students, parents, teachers, and representatives from adult service providers.
- An internship was established at a local radio station for a CBV student after graduation.
- A GED tutoring program was established for a student.
- Chromebooks were distributed to CBV students for use.

- Gym equipment was purchased for recreational activities.
- CBV established "planning days" for students to organize outings and promote goal setting.

## **Therapy Services**

- A school psychologist was hired to perform psychoeducational evaluations.
- The OTs and PTs continued to work collaboratively on school teams using input from school teams to develop goals and treatment strategies to maximize student participation in the school setting.
- The OTs developed a Preschool Parent Report Form to assist in gathering information regarding parent perception of their child's strengths and areas for growth. Therapists use this tool to guide the initial evaluation process and support the transition into the public schools.
- Select OT/PT staff participated in a virtual School-Based Medicaid Town Hall sponsored by MAOT. Details of the discussion were shared with other staff at their monthly department meeting.

- Learning Center Teams developed shared drives to support remote collaboration between team members.
- The therapy staff continued to use a variety of digital platforms to support collaboration between team members.
- OT and PT staff provided online professional development membership to support access to continuing education (OccupationlTherapy.com; PhysicalTherapy.com) approved by state and national organizations; great feedback on quality of the courses.
- The Occupational Therapists have revised all *Teacher Report of Function and Participation Forms* based on response from teachers and relevant information. Information gleaned from teachers is used to inform the evaluative process and to prioritize areas of concern in the school setting. Forms in use include: Preschool Parent Report- home report for use with students entering preschool, Preschool Teacher Report, Elementary Teacher Report, Middle/High School Teacher Report, and the Teacher Report for Students with Complex Profiles.

## **Behavior Consult and Educational Services (BCES)**

#### **Program Enhancements**

- BCBA earned re-certification to provide Quality Behavioral Solutions Safety Care training to NRC staff
- The BCBA staff provided four initial/recertification Quality Behavioral Solutions (QBS) Safety Care trainings for a total of 34 staff.
- Transportation staff were trained in the area of positive behavior interventions and supports.
- Sharepoint/OneDrive or Google Docs were consistently used for objective progress monitoring of student performance across settings.
- BCBA participated in South Shore Job Alike to support professional growth and development.

## **Social Work Internship Program**

- During 2021-22, North River's MSW Intern Program placed 10 interns across 4 districts within 9 schools serving students in grade pre-K-12<sup>th</sup>. The interns represented Bridgewater State University, Boston College, and Simmons University. Interns were in placement from late September through mid-May, completing a 34-week commitment to their placements resulting in 472-720 hours of field work per intern.
- Clinical Social work field placements are designed to provide the opportunity for students to acquire and grow in social work competencies. Each intern received two hours a week of group and individual supervision by a LICSW and was formally evaluated two times per academic year based on integration of their knowledge, skills, and value/ethics relating to the competencies and their practice.
- The program remained focused on the integration of classroom learning into the field to include the exploration of the social worker's role, professional identity, client and family engagement, assessment, intervention, and treatment evaluation while developing solid, ethical practice skills and boundaries and the application of critical thinking to inform and communicate professional judgments.
- All school staff, including principals, assistant principals, school psychologists, guidance, nurses, behaviorists, and teachers continued to be a crucial link in determining intern, student, and program success by welcoming, guiding, and supporting the interns and their learning.
- During this challenging year of a global pandemic and hybrid learning, the interns continued to solidify their roles and function within the schools and responded professionally to the many challenges and needs of the schools, children, and families. In person and remotely, they provided individual and group counseling, crisis interventions and safety evaluations, check-ins, academic and organizational support, and in class, recess, movement, and transition breaks. All of these tasks were designed to meet the social-emotional learning and mental health needs of students. The interns were active participants in student support team meetings, IEP/504's, and transition meetings.
- Interns received a total of <u>305</u> referrals for individual and group counseling services, which was an average of 30 referrals per intern. This per intern referral average was a significant increase from last year when there were 23 referrals per intern.
- Eighty percent of referrals were made on behalf of general education students, representing no change from last year's data.

- 160 students were referred for crisis, adjustment, anxiety, and trauma, while 153 referrals were identified for social skills. Seventy-eight students were referred for depression and anger while 25 students were referred for academic support and organizational help.
- One intern designed a full remote outreach program for 39 students who met weekly and remotely in groups during the academic year to address SEL and to provide for social interactions with peers.
- Another intern successfully developed and offered 28 mindfulness sessions to her students and staff during the academic year.
- Boys continue to be referred greater than girls, with 172 boys referred vs. 133 girls during the 2020-2021 school year.
- In total, the interns provided <u>2610</u> documented individual, group, in-class, crisis, check-ins, and supportive interventions, <u>1836</u> parent and teacher collaborations and outside collateral contacts. In addition, they published three parent newsletters for our parents of preschool students.
- Interns continue to work with students and parents around mutually identified treatment goals and treatment plans allowing for the necessary involvement of parents in the change process, the engagement and empowerment of students, and the evaluation and modification of interventions and treatment successes.
- Family engagement opportunities were significant this year as parents were quick to reach out to interns for support and consultation and to share common challenges while striving for a shared responsibility in student learning and development.
- Outside training included child protection laws and process by the Plymouth area DCF Office.

## **Municipal Medicaid Reimbursement**

The North River Collaborative coordinates the School-Based Municipal Medicaid Reimbursement Program for member and non-member school districts. Since the collaborative began providing this service in 1994, more than \$35 million has been returned to the participating cities and towns. In FY21, approximately \$1.4 million dollars were returned to 17 districts.

The North River Collaborative uses an internet-based Medicaid billing enhancement that reduces the burden on districts' administrative and direct care staff and provides the potential to increase Medicaid reimbursement. The software allows easy access for direct care providers to assess student history and to keep up to date with student caseloads. Additionally, administrative staff can monitor services and ensure reimbursement is maximized.

The North River Collaborative:

- Coordinates enrollment agreements
- Identifies eligible students
- Helps obtain parental permission
- Submit electronic claims
- Reconciles paid and unpaid claims
- Verifies amounts paid to towns
- Trains and works closely with district staff
- Ensures program compliance

## **Southeast Transportation Network**

#### **Program Enhancements**

The network provided special education transportation to 360 students (278 out of the Rockland and Abington Offices and 82 out of the Stoughton Office) in FY21.

- The Network enhanced its GPS system allowing improved monitoring and route planning.
- Additional cameras were installed on vehicles; now 100% of all vans have cameras for enhanced monitoring.
- All vans now have the Child Checkmate system and back up alarms.

#### **Objective 2: Offer a variety of quality professional development opportunities to general and special education teachers and administrators, and related service providers**

## **Professional Development Program Offerings**

A wide variety of professional development offerings were scheduled during FY21. Below, you will find a list of these offerings.

#### Administration, Leadership, & Evaluation

- Administrative Seminar: Legal Issues for School and District Administrators
- Educator Evaluation Mandated Training
- Studying Skillful Teaching (SST)
- The Equity Imperative
- Analyzing Teaching (ATSR)

#### Instructional Strategies, Pedagogy & Curriculum

• Enhancing Civics Education

#### **Special Education & Related Services**

- Dancing the Dance: Effective Co-Teaching Strategies
- Creating the Inclusive Classroom

#### **English Language Learning**

(some funded through Title III Grant)

- Supporting English Learners in Specialty Subjects and Support Services: Building Academic Language and Competencies of ELLs
- RETELL SEI Teacher Endorsement Cours
- Culturally & Linguistically Diverse Learners with Special Needs
- Incorporating Socio-Emotional Learning for English Learners

#### Social-Emotional Support & Behavior Intervention

- No Such Thing as a Bad Kid!
- 5 Steps to Solving a Student's Behavior
- Mental Health Issues in the Classroom
- Practical Strategies for Reducing Anxiety & Defiant Behavior in the Classroom

#### School Health & Safety

- Crisis Prevention Institute (CPI) Refresher Certification
- Adult CPR/AED, Pediatric CPR & First Aid Certification (American Red Cross)

## Objective 3: Provide programs and services in a cost-effective manner

Tuition comparisons below represent programs in the geographic region of the North River Collaborative that member districts typically use when out-of-district placements are needed for students of a particular disability. The daily rate for private schools is multiplied by 180 days to establish an equivalent tuition across programs regardless of days of operation. Additionally, there are savings to districts in transportation to program locations that are closer to their city/town which are not reflected in the charts below.

## **North River School**

## Learning Center for Students with Multiple Disabilities

## Learning Center for Students with Autism

## **Independence** Academy

Independence Academy allows multiple school districts to provide a comprehensive recovery high school alternative program to at-risk students with substance abuse and dependence diagnoses. This school is a regional program and allows school districts to access services that would not otherwise be available to their students. Funding for this program is provided through shared contributions of the Massachusetts Department of Elementary and Secondary Education (DESE) and the local school districts. DESE provides approximately \$500,000 annually to each recovery high school and the school districts' tuition contribution is equal to the state average per pupil expenditure as determined by DESE.

## **Community-Based Vocational Program**

North River's Community-Based Vocational Program allows multiple school districts to provide a comprehensive program to students with disabilities by pooling resources and students in this program. A broad range of transition services are provided to each student and placement is available in a plethora of different job sites. If each district provided this program on its own, the range of job sites would need to be less extensive, student choice would be reduced, and options would be limited. By bringing these students into one collaborative program, the ability to place a student in a job site that matches his/her interest and skill level is greatly enhanced.

## **Summer Work and Learning Program**

North River's Summer Work and Learning Program allows multiple school districts to provide a comprehensive summer program to students with disabilities. A broad range of transition services are tied to academic support and remediation for students through hands-on instruction and opportunities for work experiences, such as animal services, horticulture, building maintenance, shipping and receiving, office practices, and food service. If each district provided this program individually, the range of job sites would need to be narrower, student choice would be reduced, and options would be limited. By bringing these students into one regional program, the ability to place a student in a job site that matches his/her interest and skill level is greatly enhanced.

## **Municipal Medicaid Reimbursement**

The North River Collaborative coordinates the school-based municipal Medicaid reimbursement program for member districts and many non-member school districts. Since the Collaborative began providing this service in 1994, tens of millions of dollars have been returned to the participating cities and towns. In FY21, approximately \$1.4 million dollars were returned to 17 districts.

## **Southeast Transportation Network**

The North River Collaborative's Southeast Transportation Network provides transportation for special needs and other students as a cost-effective service for districts. In most cases, the collaborative's prices are given to districts on individual routes, and the districts choose to contract for only the routes which are cost-effective when compared with prices from other providers. In other cases, North River has provided entire portions of districts' transportation programs such as all in-district special education services or all preschool services. Thus, consolidated administrative and other supports are provided for the districts, resulting in efficiencies within their administration. In addition, the Network allows for an opportunity to maximize ridership on vehicles resulting in an economy of scale and a savings to participating districts. North River's enrollment has continued to increase each year since inception in 2007 with a few exceptions, providing solid market driven evidence that school districts find its transportation cost-efficient and highly reliable.

## **General Education Supports and Services**

The North River Collaborative offered the following general education supports and services which are described in other sections of this document:

<u>Social Work Internship Program</u>. North River's Social Work Internship Program provides school districts with low-cost counseling services for students who are at-risk. By pooling resources to provide LICSW supervision of school-based graduate level interns, the schools can offer counseling to students who would otherwise not be able to receive it. Coordination and interface with colleges and universities, families, and school staff are all included in the program.

<u>**Professional Development.</u>** Professional development offered through the collaborative is cost-effective for districts.</u>

• High-quality programs are offered that would be cost prohibitive for districts to offer individually. NRC programs allow districts to share the expense and enroll the number of staff they need to send, which helps to control cost.

- Specific needs of local districts are addressed through the design and selection of programs.
- Grant funding supports professional development for district and NRC staff.
- District capacity is expanded by the collaborative organizing appropriate and responsive training that is easily accessible for their staff members, usually at a lower rate than other public offerings.

## **Objective 4: Explore and pursue grant and other funding** to support identified needs of the districts

The following chart details the grant funding received by the North River Collaborative on behalf of school districts in FY20 and FY21.

Grants on Behalf of Districts:	FY20	FY21
Recovery High School (Independence		
Academy)	\$587,000	\$500,000
<b>2</b> /	N/A	N/A
Mass Commission for the Blind	\$9,223	N/A
Title III Consortium Grant	\$36,109	\$49,111
CommBuys (SPED-SEL)	N/A	N/A
	NA	NA
Total Grants for Districts	\$632,332	\$549,111
Grants to Support NRC Programs:		
Safe and Supportive Schools Grant	\$7,988	\$8,000
Mass Mechanics	N/A	N/A
Special Education Improvement Grant	N/A	\$7,740
Total Grants to Support NRC		
Programs:	\$7,988	\$15,740
Total Grants	\$640,320	\$564,851

#### **Funded Grants and Contracts**

#### **Collaborative Grant Applications**

The North River Collaborative has a history of successfully implementing major federal/state programs to expand the capacity of member school districts at no cost. NRC has spearheaded the procurement of grant and foundation funding through agencies such as the Massachusetts Department of Elementary and Secondary Education, the Massachusetts Commission for the Blind, and other public/private foundations, and organizations. During FY21, the total amount awarded on behalf of districts and to support NRC programs was **\$564,851**. Districts received the following grant funded supports and services:

- Transportation and extended day/year programming for students in recovery.
- Safe and Supportive Schools initiative activities to assist our programs in enhancing the safety and well-being of students.
- After school/weekend recreational program for students with visual impairment.
- Tutoring, professional development, and parent support for English language learners.
