AHERA 3 Year Re-Inspection and Management Plan

Public Notice

In accordance with the United States Department of Environmental Protection Agency (EPA) AHERA, an asbestos re-inspection report and management plan was prepared by a Massachusetts licensed asbestos inspector and management planner from Environmental Consulting and Management, 181 Amaral Street, Riverside, RI 02915. This plan is available for public review during school hours in the main office. For additional information, please contact Paul Tzovolos, (781) 878-6056.

No asbestos containing materials were identified during the inspection on April 17, 2024. There were some materials listed as assumed asbestos, as sampling them was not possible without damaging the material. The management plan on file outlines the safe navigation of these materials, which are not deemed a safety hazard for students or staff.
